Projects

www.DanielPerezDev.com   Spring 2021
Full-Stack Web Developer

- Fully designed and constructed portfolio website using HTML5 and CSS in tandem with Bootstrap, completely dynamic and mobile friendly.
- Engineered a RESTful API with Spring that fetches and posts data from a PostgreSQL database.
- Configured postgreSQL database tables, in conjunction with Spring JPA.
- Secured API endpoints using Oauth2 and Okta.
- Constructed Github widget displaying personal projects using Github's RESTful API and Angular.
- Updated front-end from AngularJS to Angular in Typescript.
- Built a fully featured CMS and Text-Editor for Blog management.

Work Experience

BMP AutoDetailing   2014-2021
Web Developer - Customer Service

- Created Front-End Website to drive sales within a localized area of South Florida.
- Configured SEO to land a higher spot on the google search algorithm for local customer outreach.
- Provided customer service to both Spanish and English speaking customers.
